The Self-taught Programmer Cory Althoff 2022-01-13 'One of the best software design books of all time' - BookAuthority Cory Althoff is a self-taught programmer. After a year of self-study, he learned to program well enough to land a job as a software engineer II at eBay. But once he got there, he realised he was severely under-prepared. He was overwhelmed by the amount of things he needed to know but hadn't learned. His journey learning to program, and his experience in first software engineering job were the inspiration for this book. This book is not just about learning to program, although you will learn to code. If you want to program

professionally, it is not enough to learn to code; that is why, in addition to helping you learn to program, Althoff also cover the rest of the things you need to know to program professionally that classes and books don't teach you. The Self-taught Programmer is a roadmap, a guide to take you from writing your first Python program to passing your first technical interview. The book is divided into five sections: 1. Learn to program in Python 3 and build your first program. 2. Learn object-oriented programming and create a powerful Python program to get you hooked. 3. Learn to use tools like Git, Bash and regular expressions. Then use your new coding skills to build a web scraper. 4. Study computer science fundamentals like data structures and algorithms. 5. Finish with best coding practices, tips for working with a team and advice on landing a programming job. You can learn to program professionally. The path is there. Will you take it? From the author I spent one year writing The Self-Taught Programmer. It was an exciting and rewarding experience. I treated my book like a software project. After I finished writing it, I created a program to pick out all of the code examples from the book and execute them in Python to make sure all 300+ examples worked properly. Then I wrote software to add line numbers and color to every code example. Finally, I had a group of 200 new programmers 'beta read' the book to identify poorly explained concepts and look for any errors my program missed. I hope you learn as much reading my book as I did writing it. Best of luck with your programming!

A History of Online Information Services, 1963-1976 Charles P. Bourne 2003-08-01 A detailed chronology of the early, pre-Internet years of online information systems and services. Every field of history has a basic

need for a detailed chronology of what happened: who did what when. In the absence of such a resource, fanciful accounts flourish. This book provides a rich narrative of the early development of online information retrieval systems and services, from 1963 to 1976—a period important to anyone who uses a search engine, online catalog, or large database. Drawing on personal experience, extensive research, and interviews with many of the key participants, the book describes the individuals, projects, and institutions of the period. It also corrects many common errors and misconceptions and provides milestones for many of the significant developments in online systems and technology.

Trailblazers, Black Women Who Helped Make America Great

Gabrielle David 2022-05-20 The fourth volume in the Trailblazers series highlights Black women's contributions in film and television, the sciences, and journalism. Black women have been breaking down barriers and shattering stereotypes for generations, playing a powerful role in American history. In the Trailblazers series, Gabrielle David examines the lives and careers of over four hundred brilliant women from the eighteenth century to the present. Each volume provides biographical information, photographs, and a historical timeline written from the viewpoint of Black women, offering accessible reference resources. This fourth volume of Trailblazers explores the complicated relationship that Hollywood has had with Black women actors; significant Black women in the fields of science, technology, engineering, and mathematics (STEM); and pioneering Black women journalists. David includes actors such as Hattie McDaniel, Fredi Washington, and Nina Mae McKinney who blazed the trail for women like Pam Grier, Halle Berry, and Viola Davis. "Hidden figures" in STEM are brought to light, such as biologist Jewel Plummer Cobb, mathematician Dorothy Vaughan, roboticist Ayanna Howard, and computer scientist Timnit Gebru. In addition, profiles of publishing pioneers like Ida B. Wells-Barnett, Mary Ann Shadd Cary, Josephine St. Pierre Ruffin, and Nancy Hicks Maynard show how they paved the way for Carole Simpson, Yamiche Alcindor, Nikole Hannah-Jones, and Jemele Hill.
