Alloy selection for service in sulphuric acid - Nickel Institute

Ductile (nodular) cast iron is less effective. The austenitic high-nickel cast irons offer no significant advantage but 14% silicon cast iron has excellent resistance up to 100% acid at the boiling point, with corrosion rates less than 0.12 mm/y (5 mpy) over the range of concentrations. The high-silicon cast iron resistance is due to

PRECAST CONCRETE ARCHITECTURAL REPAIR GUIDE

this guide will address some of the most common situations. It covers the basics and common methodologies of repairs. Unique situations will require

you to develop repair techniques based on the appropriate methodology. This guide is not a replacement for good quality concreting practices, which will reduce the amount of production-related repairs.
