Air Conditioning Principles and Systems Edward  
G. Pita 1989 This is a new edition of the standard

air conditioning installation/service text,  
emphasizing energy conservation. It contains new  
material on heating and computer programs, and  
new load calculation problems. The book provides  
thorough coverage of the fundamentals of air  
conditioning, explains relationships of theory to  
design of new systems, and discusses  
troubleshooting of existing systems. Air  
conditioning and refrigeration equipment and  
systems, and refrigeration absorption systems  
and heat pumps are all covered. Computer  
programs for load estimating are also described,  
and there are many illustrative examples of real-

world situations. The text is consistent with all ASHRAE load estimating guidelines.

**The Marmon Heritage** George Philip Hanley 1985 Recipient McKean Cup & Cugnot Awards. An automotive business & technical history addressing innovative products, construction details, marketing & manufacture, organization & financing. Marmon of Indianapolis revolutionized grain milling, electrified major cities, was innovator in engineering & styling the automobile for three decades. Dominance in racing & victory in first INDY 500 made Marmon Speedsteers the 'Corvettes' of the 1920s. Marmon-Herrington built

All-Wheel-Drive trucks during the next three decades, including AWD Ford cars & trucks. Marmon Group today is among world's most diverse firms. The book contrasts sharply with the perceived state of early century technology & product reliability-durability. "Industrial titles are increasingly more important in research libraries. I am most impressed with THE MARMON HERITAGE as a product. Well done!"--R.E. Chapin, Director Libraries, Michigan State University. "One of the most unusual books published in recent years, it is at once history, technical manual, & panea of praise for the

products. It will have great appeal to engineers, students of technology or advertising"--Prof. Ralph D. Gray, Indiana-Purdue Universities, Indianapolis. "I would like to express my sincere admiration for the accomplishment that is THE MARMON HERITAGE, a magnificent exercise in scholarship & a monumental contribution to the literature."--Griffith Borgeson, European Editor, AUTOMOTIVE QUARTERLY.

Ergonomics for Rehabilitation Professionals  
Shrawan Kumar 2009-04-27 Despite the apparently distinct differences between the

disciplines of ergonomics and rehabilitation, they deal with the same issues, although at different ends of the spectrum. Keeping this in mind, *Ergonomics for Rehabilitation Professionals* explores their philosophies and goals, their parallel, divergent, and complementary aspects. It traces the origin of each field and examines the role of ergonomics in rehabilitation. The book begins with a theoretical and conceptual review of ergonomics and its role in rehabilitation. It covers anthropometry and its impact on human biomechanics, allowing readers to grasp complex concepts, visualize what forces are acting where,

and understand the consequence of this force. A chapter on tissue mechanics provides an understanding of the effect of the overall load on the tissues and a rationale for possible mechanisms of injury that can be used to design prevention and treatment methods. The book explores the relevant physiological issues, looking at the energy cost of activities and the data on strength and endurance. It discusses whole body biomechanics using an approach that supplies intuitive understanding of the effects of force, gravity, and physiological variables in an integrated manner. Addressing theoretical

underpinnings with scientific rigor, the book covers a broad range of topics, always emphasizing design in rehabilitation. The editor's organization of the material develops concepts in concentric circles with increasing radii, sequencing ideas and exploring them from simple to complex. This selection of topics from two vast and seemingly diverse disciplines provides the tools for setting realistic goals and developing the strategies to achieve them.
