**White Paper on Defence** 2019

**Protection of Civilians** Haidi Willmot 2016-04-14 The protection of civilians is a highly topical issue at the forefront of international discourse, and has taken a prominent role in many international deployments. It has been at the centre of debates on the NATO intervention in Libya, UN deployments in Darfur, South Sudan, and the Democratic Republic of the Congo, and on the failures of the international community in Sri Lanka and Syria. Variously described as a moral responsibility, a legal obligation, a mandated peacekeeping task, and the culmination of humanitarian activity, it has become a high-profile concern of governments, international organisations, and civil society, and a central issue in international peace and security. This book offers a multidisciplinary treatment of this important topic, harnessing perspectives from international law and international relations, traversing academia and practice. Moving from the historical and philosophical development of the civilian protection concept,

through relevant bodies of international law and normative underpinnings, and on to politics and practice, the volume presents coherent cross-cutting analysis of the realities of conflict and diplomacy. In doing so, it engages a series of current debates, including on the role of politics in what has often been characterized as a humanitarian endeavour, and the challenges and impacts of the use of force. The work brings together a wide array of eminent academics and respected practitioners, incorporating contributions from legal scholars and ethicists, political commentators, diplomats, UN officials, military commanders, development experts and humanitarian aid workers. As the most comprehensive publication on the subject, this will be a first port of call for anyone studying or working towards a better protection of civilians in conflict.

**Birth of a Constitution** Bertus De Villiers 1994 This text provides an analysis of the South African constitution. Various elements are analyzed and compared with other constitutions. The behind-doors negotiation and agreements in the negotiation process are discussed and dissected, and proposals for improvements are made.

Economic Survey 2017-18 (Volume I and Volume II) Ministry of

Finance, Government of India 2018-03-31 The Economic Survey is the budget document of the Government of India. It presents the state of affairs of the Indian economy. Economic Survey 2017-18 consists of two volumes. Volume I provides an analytical overview of the performance of the Indian economy during the financial year 2017-18. It highlights the long-term challenges facing the economy. Volume II is a descriptive review of the major sectors of the economy. It emphasizes economic reforms of contemporary relevance like GST, the investment-saving slowdown, fiscal federalism and accountability, gender inequality, climate change and agriculture, science and technology, among others.

*Telecommunication & Media* IT Shades 2020-02-11 Bell Canada and the City of Hamilton are pleased to announce they will be moving forward together with a Bell investment of approximately \$400 million to expand broadband Internet access in urban and rural areas of Hamilton, the largest digital infrastructure investment in the City's history. Over the next five years, Bell and a Bell-funded team of City of Hamilton staff will bring direct fibre

network connections to more than 200,000 homes and business locations throughout the City with zero cost to taxpayers. The network will provide consumers with access to data speeds up to 1.5 gigabits per second, the fastest home Internet speeds in Canada. Working in partnership with the Hamilton Chamber of Commerce's Digital Infrastructure Task Force, gaps in digital infrastructure across the community were identified.

Subsequently, the City worked to increase investment in digital infrastructure to address the gaps. As part of the plan to enhance Hamilton's standing as a Digital City, Mayor Eisenberger requested that broadband speeds be enhanced for all of urban Hamilton, business parks and major commercial areas, and rural areas in the community. In addition to premium network support for the City's business community, the Bell project includes the expansion of high-speed Bell Wireless Home Internet service to 8,000 homes in rural Hamilton. This innovative 5G capable technology delivered over Bell's advanced LTE wireless network provides broadband residential Internet access for small towns, farming communities and other less populated locations. Bell will work in close cooperation with the City and local contractors, including Aecon, Telecon and Sentrex, to employ innovative techniques to minimize disruption to residents and businesses throughout the project. The majority of the network build will consist of new fibre installed underground, with additional fibre located on Bell, Hydro One and Alectra Utilities poles.

**Under Italian Skies** Nicky Pellegrino 2016-04-07 Stella has life under control - and that's the way she likes it. For twenty-five years, she's been trusted assistant to a legendary fashion designer but after her boss dies suddenly, she's left with nothing to do apart from clear the studio. It seems as though the life she wanted has vanished. She is lost - until one day she finds a house swap website and sees a beautiful old villa in a southern Italian village. Could she really exchange her poky London flat for that? But what was just intended as a break becomes much more, as

Stella finds herself trying on a stranger's life. As the villa begins to get under her skin, she can't help but imagine the owner from the clues around her. She meets his friends, cooks the local food he recommends and follows suggestions to go to his favourite places. But can an idea of someone ever match up the reality? As Stella wonders if she can let go of the safety of her past, perhaps there's a chance for her to find a way into her future . . .

### **Manufacturing Facilities Design and Material Handling**

Fred E. Meyers 2005 This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

**Technical Cooperation in Health** United States. International Cooperation Administration 1959

*Pharmaceutical Product Development* Vandana B. Patravale 2016-05-25 Pharmaceutical product development is a multidisciplinary activity involving extensive efforts in systematic product development and optimization in compliance with regulatory authorities to ensure the quality, efficacy and safety of resulting products. Pharmaceutical Product Development equips the pharmaceutical formulation scientist with extensive and up-to-date knowledge of drug product development and covers all steps from the beginning of product conception to the final packaged form that enters the market and lifecycle management

thereof. Applications of core scientific principles for product development are also thoroughly discussed in conjunction with the latest approaches involving design of experiment and quality by design with comprehensive illustrations based on practical case studies of several dosage forms. The book presents pharmaceutical product development information in an easy-to-read mode with simplified theories, case studies and guidelines for students, academicians and professionals in the pharmaceutical industry. It is an invaluable resource and hands-on guide covering managerial, regulatory and practical aspects of pharmaceutical product lifecycle management.

**UNCTAD VIII** United Nations Conference on Trade and Development 1992

*SIPRI Yearbook 1995* Stockholm International Peace Research Institute 1995 The SIPRI Yearbook 1995 continues SIPRI's review of the latest developments in regional security, nuclear weapons, world military expenditure, the international arms trade and arms production, chemical and biological weapons, armed conflicts, and nuclear and conventional arms control in 1994.

**From Defence to Development** International Development Research Centre (Canada) 1998 From Defence to Development: Redirecting military resources in South Africa

Japanese Cinema Goes Global Yoshiharu Tezuka 2011-11-01 Japan's film industry has gone through dramatic changes in recent decades, as international consumer forces and transnational talent have brought unprecedented engagement with global trends. With careful research and also unique first-person observations drawn from years of working within the international industry of Japanese film, the author aims to examine how different generations of Japanese filmmakers engaged and interacted with the structural opportunities and limitations posed by external forces, and how their subjectivity has been shaped by their transnational experiences and has changed as a result. Having been through the globalization of the

last part of the twentieth century, are Japanese themselves and overseas consumers of Japanese culture really becoming more cosmopolitan? If so, what does it mean for Japan's national culture and the traditional sense of national belonging among Japanese people?

*Ship Automation* Alexandr Yakimchuk 2012

*A Capital City at the Margins* Michael D. Panté 2019

Persistence of Race Nina G. Jablonski 2020-02-25 This is the third and final group of essays emerging from the discussions of the Effects of Race Project at the Stellenbosch Institute for Advanced Study (STIAS) that occurred in 2016 and 2017. The authors consider the biological and social understandings of race, and how new information from both the biological and social sciences is changing our perspective on the nature of the human condition, including the association of biological and social phenomena with "race". They also look at global events or movements which influence these processes in South Africa and the costs of a racialised world order to humans and humanity. Phenomena are examined through the lenses of many disciplines: sociology, history, geography, anthropology and writing.

The Manufacturing of Greta Thunberg Cory Morningstar 2019-11-19 The manufacturing of Greta Thunberg - for consent: the political economy of the non-profit industrial complex We are introduced to the not-so accidental phenomena of Greta Thunberg, the current child prodigy and face of the youth climate change movement. The "climate change is real" message is reframed for public consumption and rolled out at an international level, using Greta and her global platform to "sound the alarm" on climate change. This climate emergency is likened to a "house on fire", while urging the public to be serious, patriotic, empathetic and, of course, nonviolent. Not one sentence of the new strategy mentions the horrific impact militarism has on climate change. The New Climate Economy being pushed by groups like Extinction Rebellion merely repackages our oppression

into emergency mode. This urgency becomes global so that governments, NGOs and corporations will all direct immediate funding towards unlocking trillions of capital needed to save capitalism by further funding the new green imperialism. Today's youth are used and molded into market solutions to insulate a global elite. Celebrity-sponsored activism seeks to build a new industry in which NGOs, the media and corporate powers collude to get people to support the very industries we should be erasing from the planet. The planet's most powerful capitalists lie behind these "youth-led" movements for climate change, helping to manufacture consent for the "fourth industrial revolution" in an attempt to quell resistance to industrial civilisation.

**Commercial Nuclear Power** 1983

Normal and Abnormal Development Sir Stewart Duke-Elder 1972

**Non Sequitur** Mary Elizabeth Coleridge 1900

**Sports for Development** Laura Jaitman 2017-12-23

XXXXX Martin Howse 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this Hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E.

Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adaptor which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a

reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

**The Cognitive Life of Things** Lambros Malafouris 2010 "Things have a social life. They also lead cognitive lives, working subtly in our minds. But just how is it that human thought has become so deeply involved in and expressed through material things? There is today a wide recognition that material culture regulates and shapes the ways in which people perceive, think and act. But just how does that work? This is one of the most challenging research topics for the archaeology and anthropology of human cognition. The understanding of the working of past and present material culture - its cognitive efficacy - is becoming a key issue in the cognitive and social sciences more widely. This volume, with innovative case studies ranging from prehistory to the present, seeks to establish a cross-disciplinary framework and to set out future directions for research. Its aim is to redress the balance of the cognitive equation by at last bringing materiality firmly into the cognitive fold. But how can we integrate artefacts - material culture - into existing theories of human cognition? How do we understand the significant role of the human use of the things we have ourselves created in the development of human intelligence? The distinguished contributors here argue that the boundaries of the mind must now be understood as extending beyond the

individual and to include the world of the artefact if we are fully to grasp how interactions among people, things, space and time have come, over thousands of years, to shape the transformations in human cognition that have made us what we are."--Publisher's description.

Tents As Portable Shelters: A Contemporary Study In Rajasthan

publication focuses on sustainable-tourism governance approaches that have helped to realize tourism's potential to contribute to economic growth and improved livelihoods in the Asia and the Pacific region.

**Syria** Professor of International Relations and Middle Politics

Raymond Hinnebusch 2004-08-02 This study examines the development of the Syrian state as it has emerged under thirty-five years of military-Ba'thist rule and, particularly, under President Hafiz al-Asad. It analyzes the way in which the fragility of the post-independence state, unable to contain rising nationalist struggle and class conflict, opened the way to the Ba'th party's rise to power and examines how the Ba'th's 'revolution from above' transformed Syria's socio-political terrain.

**Unfinished Business: Democracy in Namibia** M. Sims

2012-04-24 Idasas Democracy Index initially developed for South Africa is being expanded into Southern Africa in an effort to broaden the capacity of individuals and organisations monitoring and supporting democratic governance efforts in the region. This inaugural Democracy Index for Namibia is intended to set a benchmark for democracy to be measured against. The tool assesses the countrys depth of democracy through five focus areas: participation, elections, accountability, political rights, and human dignity. The research relies on expert analysis to answer a

set of questions that interrogate how closely, in practice, democracy meets the broad ideal of self-representative government. More specifically, to what extent can citizens control elected officials and government appointees who make decisions about public affairs? And how equal are citizens to one another in this accountability process? The purpose of the scores is to assist citizens in making their own judgements, based on the information made available, to stimulate national debate and to provide democracy promoters with a tool for identifying issues and needs that can be addressed by education, advocacy, training, institution building and policy revision.

**Trump's Travel Ban** Make America Make America Great Again 2017-02-05 This book neutrally discusses the concepts and potential implications of the recent executive order by Donald J Trump; America's 45th President, to close the US borders from seven majority-Muslim countries; (i) Iran; (ii) Iraq; (iii) Syria; (iv) Libya; (v) Sudan; (vi) Somalia; (vii) and Yemen. An exploration of how this decision could affect global economies, enterprises, socio-culture and domestic citizens, will be analysed and concluded with recommendations; which if implemented appropriately by governments and global/national institutions, could lead to favourable outcomes for majority and minority subjects. The imperatives of US social values and beliefs are also explored, thus enabling a comprehensive and unbiased debate to occur allowing readers to evaluate all presented arguments; and come to their own logical conclusion(s). Social interconnectivity and modernistic values underpin the majority of major economic decisions and policies in 2017, therefore the repercussions of an agenda which could be construed as divisive may have significant social, political and economic ramifications for America's 44th President. An academic methodology is used to ensure evaluative criticality, theoretical reasoning and warranted recommendations throughout this piece. Oh, and thanks for reading; feel free to share this literature with associates, friends, and family to

generate broader opinion across this highly pertinent and engulfing subject matter, thank you.

Responsibilities and Functions of a Nuclear Energy Programme Implementing Organization International Atomic Energy Agency 2019-07-02 An important element of the milestones approach to introducing nuclear power is a mechanism to coordinate efforts among the many organizations and individuals who have roles to play in the process. This mechanism is referred to as a nuclear energy programme implementing organization (NEPIO). This publication describes a set of responsibilities, functions and activities that States can use as guidance for establishing a NEPIO and ensuring its effectiveness. This revision incorporates lessons learned from integrated nuclear infrastructure review missions and IAEA technical assistance activities. It attempts to clarify that there are many ways to structure a NEPIO and that each could result in the successful execution of all functions and activities. Several case studies are included. Consistent with the revision of IAEA Nuclear Energy Series No. NG-G-3.1 (Rev. 1) Milestones in the Development of a National Infrastructure for Nuclear Power published in 2015, this publication recognizes that the NEPIO plays an important and evolving role in each of the three phases of nuclear power infrastructure development.

**Environmental and Energy Law** Karen Makuch 2012-07-23 Despite bringing prosperity, industrialisation generally leads to increasing levels of pollution which has a detrimental impact on the environment. In response, legislation which seeks to control or prevent such impact has become common. Similarly, climate change and energy security have become major drivers for the regulatory regimes that have emerged in the energy field.

Given the global or regional scope of many environmental problems, international cooperation is often necessary to ensure such legislation is effective. The EU and the UK have contributed to the development of the environmental and energy law regimes currently in force, spanning across international, transnational and national levels. At the same time, practical responses to environmental and energy problems have largely been the focus of engineers, scientists and other technical experts. Environmental & Energy Law attempts to bridge the knowledge gap between legal developments designed to achieve environmental and/or energy-related objectives and the practical, scientific and technical considerations applicable to the same environmental problems. In particular, it attempts to convey a broad range of topical issues in environmental and energy law, from climate and energy regulation, technology innovation and transfer, to pollution control, environmental governance and enforcement. In addition the book outlines key sector specific legal regimes (including water, waste and air quality management), focusing on issues or topics that are particularly relevant to both environmental and energy lawyers, and engineering, science and technology-oriented professionals and students. In this vein, the book guides the reader on some basic practical applications of the law within scientific, engineering and other practical settings. The book will be useful to all those working or studying in the environmental or energy arena, including law students, legal professionals, engineering and science students and professionals. By adopting a multi-disciplinary approach to environmental and energy law, the book embraces all readerships and helps to address the often thorny problem of communication between scientists, engineers, lawyers and policy-makers.

**Still Killing** Alex Vines 1997 Momentum for a ban
