ODE TO A NIGHTINGALE John Keats 2017-08-07 This eBook edition of "Ode to a Nightingale" has been formatted to the highest digital standards and adjusted for readability on all devices. "Ode to a Nightingale" is either the garden of the Spaniards Inn, Hampstead, London, or, according to Keats' friend Charles Armitage Brown, under a plum tree in the garden of Keats House, also in Hampstead. According to Brown, a nightingale had built its nest near his home in the spring of 1819. Inspired by the bird's song, Keats composed the poem in one day. It soon became one of his 1819 odes and was first published in Annals of the Fine Arts the following July. "Ode to a Nightingale" is a personal poem that describes Keats's journey into the state of Negative Capability. The tone of the poem rejects the optimistic pursuit of pleasure found within Keats's earlier poems and explores the themes of nature, transience and mortality, the latter being particularly personal to Keats. The nightingale described within the poem experiences a type of death but does not actually die. Instead, the songbird is capable of living through its song, which is a fate that humans cannot expect. John Keats (1795-1821) was an English Romantic poet. The poetry of Keats is characterized by sensual imagery, most notably in the series of odes. Today his poems and letters are some of the most popular and most analyzed in English literature.

Handbook IMCI World Health Organization. Department of Child and Adolescent Health and Development 2005 This handbook gives a detailed explanation of the WHO/UNICEF guidelines for the integrated management of childhood illness (IMCI). The guidelines set out simple and effective methods for the prevention and management of the leading causes of serious illness and mortality in young children. They promote evidence-based assessment and treatment using a syndromic approach that supports the rational, effective and affordable use of drugs. The handbook gives an overview of the IMCI process and includes technical guidelines to assess and classify a sick young infant aged from one week up to two months, and a sick young child aged two months to five years; as well as guidance on how to identify treatment; communicate and counsel; and give follow-up care.

Everyday Feminist Research Praxis Koen Leurs 2014-10-02 Everyday Feminist Research Praxis: Doing Gender in The Netherlands offers a selection of previously unpublished work presented during the 2011, 2012 and 2013 Netherlands Research School of Gender Studies (NOG) conferences. Reflecting the wide spectrum of interdisciplinary gender studies, this volume is organised into four sections along four conceptual knots. These thematic entry-points are space/time, affectivity, public/private, and technological mediation. The central emphasis of this volume is twofold: first, the everyday is approached as a concretely grounded site of micro-political power struggles. Second, the contributors make explicit connections between theory and their everyday feminist research practices. As a whole, the interventions – ranging from fashion modelling, child-birthing discourses and digital documentaries – show how feminist research praxis remains crucial in critically disentangling naturalized routines of daily life, which in turn enables the scrutiny of, for example, the arbitrariness of entrenched power relations and contradictory, personal and collective, everyday trajectories. Everyday Feminist Research Praxis, thus, energises possibilities for new forms of recognition, representation and redistribution of power.

Poverty and Famines Amartya Sen 1983-01-20 This book focuses on the causes of starvation in general and famines in particular. The traditional analysis of famines is shown to be fundamentally defective, and the author develops an alternative analysis.

Innovative Strategies in Technical and Vocational Education and Training for Accelerated Human Resource Development in South Asia: Bangladesh Asian Development Bank 2015-09-01 This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia).

Mobile Learning Design Daniel Churchill 2015-12-21 This book focuses on mobile learning design from both theoretical and practical perspectives. It introduces and discusses how mobile learning can be effectively integrated into curricula, highlighting the design of four key components of learning-centric pedagogy: Resource, Activity, Support and Evaluation in the context of mobile learning. It also investigates the learning theories underpinning mobile learning design, and includes case studies in different contexts. It provides practical insights that allow teachers to change and transform teaching practices using mobile technology. Anyone involved in mobile-technology enhanced learning and teaching will find this book both informative and useful.

Raising the Bar for Productive Cities in Latin America and the Caribbean María Marta Ferreyra 2018-06-07 With more than 70 percent of its population living in cities, Latin America and the Caribbean (LAC) is among the most urbanized regions in the world. Yet, although its cities are, on average, more productive than those elsewhere in the world, their productivity lags that of North American and Western European cities. Closing this gap provides LAC with the opportunity to raise living standards and join the ranks of the world's richest countries. Raising the Bar: Cities and Productivity in Latin America and the Caribbean is about the productivity of cities in LAC and the factors that help to explain its determination. Based on original empirical research, the report documents the high levels of population density and other features of LAC cities that mark them out from those in the rest of the world. The report also studies the role of three key factors – urban form, skills, and access to markets – in determining the productivity of LAC cities. It shows that while excessive congestion forces and inadequate metropolitan coordination seem to be stifling the benefits of agglomeration, LAC cities benefit from strong human capital externalities. It also finds that, within individual LAC countries, cities are poorly integrated with one another, which contributes to large differences in performance across cities and undermines their aggregate contribution to productivity at the national level. **A Measured Approach to Ending Poverty and Boosting Shared Prosperity** World Bank 2014-10-07 "This Policy Research Report was prepared by the Development Economics Research Group of the World Bank by a team led by Dean Jolliffe and Peter Lanjouw"--Page xiii.

Local Agrarian Societies in Colonial India Kaoru Sugihara 1996 This volume is the first systematic attempt to introduce a full range of Japanese scholarship on the agrarian history of British India to the English-language reader. Ten leading Japanese scholars present a collection of essays, all of them appearing in accessible form in English for the first time. In addition to two in-depth analyses of late 18th century records on South India and North Bengal respectively, five chapters deal with the late colonial period. Detailed statistical examinations provide a basis for a revised understanding of social mobility and land transfer, while a quantitative study of technology and labour absorption, a demographic approach to famines and epidemics, and a socio-political perspective of tenancy acts offer new blends of history and social science. While the findings are summarised in a full-length introduction by Peter Robb, there are four additional chapters which compare explicitly the Indian experience with those of Japan and other Asian countries. Using the Japanese experience as a yardstick, Sugihara and Yanagisawa argue for the historical presence of internal forces of change in Indian agriculture which has not been fully recognised in either western or nationalist historiography. They suggest the fundamental importance of an Asian comparative perspective for the understanding of Indian history.

South Asia's Hotspots Muthukumara Mani 2018-07-12 South Asia is particularly vulnerable to climate change. Most previous studies have focused on the projected impacts of sea-level rise or extreme weather - droughts, floods, heatwaves and storm surges. This study adds to that knowledge by identifying the impacts of long-term changes in the climate – rising temperatures and changes in precipitation patterns – on living standards. It does so by first building an understanding of the relationship between current climate conditions and living standards across South Asia. The study also identifies the set of climate models that are best suited for projecting long-term changes in climate across South Asia. This novel understanding of living standards and climate change is then combined to project impacts of long-term changes in climate on living standards in South Asia. The study finds that higher temperatures will reduce living standards for most of South Asia, with the severity impacts depending on future global greenhouse gas emissions. The study projects "hotspots", which are locations where long-term changes in climate will have negative impacts on living standards. Many hotspots are in locations that hitherto have not been identified as particularly vulnerable to climate change. Moreover, hotspots have distinguishing features that vary from country to country. This detailed assessment provides a mosaic of information that enriches our understanding of how climate change will impact people and which populations are most vulnerable. The report also provides guidance on the kinds of actions are most likely to reduce impacts of climate change in each country. The study is a major contribution to our understanding of how increasing temperatures and changing precipitation patterns interact with social and economic structures at a fine granular level across South Asia. **Gitanjali** Rabindranath Tagore 1914

Bangladesh Health System Review Who Regional Office for the Western Paci 2015-09-02 The Health Systems in Transition (HiT) profiles are country-based reports that provide a detailed description of a health system and of reform and policy initiatives in progress or under development in a specific country. Each profile is produced by country experts in collaboration with an international editor. In order to facilitate comparisons between countries, the profiles are based on a common template used by the Asia Pacific and European Observatories on Health Systems and Policies. The template provides detailed guidelines and specific questions, definitions and examples needed to compile a profile.

Psychopathology in Women Margarita Sáenz-Herrero 2014-10-14 Gender has a fundamental influence on the human brain, not only by virtue of biological and hormonal differences between the sexes but also because of the impact of gender-specific cultural, social, anthropological and environmental factors. Nevertheless, the relation of gender and psychopathology remains a largely neglected field. Gender perspective has been treated as a paradigm in this book on psychopathology because it determines the way in which a psychiatric symptom is defined, perceived and understood. This conception of gender as being of key importance in the definition of psychiatric symptomatology is exceptional in the literature. The book opens by examining historical and cultural aspects of mental health in women worldwide and the relation of sex, brain and gender, with coverage of both neurobiological and psychosocial aspects. The significance of gender with regard to specific aspects of psychopathology is then addressed in detail. A wide range of psychological disorders are considered, as well as hormonal influences and issues concerning body image, self identity, sexuality and life instinct. It is hoped that this book will make a significant contribution in ensuring that gender perspective receives due attention within descriptive psychopathology.

Buddhist Divinities Puspa Niyogi 2001 Illustrations: Numerous B/w Illustrations Description: Buddhist Divinities is a thoughtful contribution to the history of Buddhism comprising both history of religion and art. It presents a systematic account of many renowned scholars of Buddhist religion, philosophy and literature who worked and studied in the monastic universities of Bengal and Bihar. These scholars contributed most to the history of Buddhist religion and for this they received respect above god for their learning and character. Besides these deified historical personages a detailed list is made of Buddhist gods and goddesses (on the basis of images discovered), both major and minor with their symbols, attributes, characteristics and iconographical details, in the hope that it may help to give a broad and general idea of the peculiarities of Buddhism which were developing in some of its later phases. The book is a comprehensive treatment of these subjects which are vital from the point of view of history of Buddhism, both history of religion and art: but which are least understood and studied in systematic manner.

Student Learning in South Asia Halil Dunder 2014-05-30 This book analyzes the performance of South Asian educational systems and identifies the causes and correlates of student learning outcomes. Marginality Joachim von Braun 2013-08-19 This book takes a new approach on understanding causes of extreme poverty and promising actions to address it. Its focus is on marginality being a root cause of poverty and deprivation. "Marginality" is the position of people on the edge, preventing their access to resources, freedom of choices, and the development of capabilities. The book is research based with original empirical analyses at local, national, and local scales; book contributors are leaders in their fields and have backgrounds in different disciplines. An important message of the book is that economic and ecological approaches and institutional innovations need to be integrated to overcome marginality. The book will be a valuable source for development scholars and students, actors that design public policies, and for social innovators in the private sector and non-governmental organizations.

The Routledge Handbook of English Language Education in Bangladesh Shaila Sultana 2020-12-18 This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting

descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

Introduction to Genomics Arthur M. Lesk 2007 Our genome is the blueprint to our existence: it encodes all the information we need to develop from a single cell into a hugely complicated functional organism. But it is more than a static information store: our genome is a dynamic, tightly-regulated collection of genes, which switch on and off in many combinations to give the variety of cells from which our bodies are formed. But how do we identify the genes that make up our genome? How we determine their function? And how do different genes form the regulatory networks that direct the process of life? Introduction to Genomics is a fascinating insight into what can be revealed from the study of genomes: how organisms differ or match;

how different organisms evolved; how the genome is constructed and how it operates; and what our understanding of genomics means in terms of our future health and wellbeing. Covering the latest techniques that enable us to study the genome in ever-increasing detail, the book explores what the genome tells us about life at the level of the molecule, the cell, the organism, the ecosystem and the biosphere. Learning features throughout make this book the ideal teaching and learning tool: extensive end of chapter exercises and problems help the student to grasp fully the concepts being presented, while end of chapter WebLems (web-based problems) and lab assignments give the student the opportunity to engage with the subject in a hands-on manner. The field of genomics is enabling us to analyze life in more detail than ever before; Introduction to Genomics is the perfect guide to this enthralling subject. Online Resource Centre: - Figures from the book available to download, to facilitate lecture preparation - Answers to odd-numbered end of chapter exercises, and hints for solving end of chapter problems, to support self-directed learning - Library of web links, for rapid access to a wider pool of additional resources

The Cambridge Handbook of the International Psychology of Women Fanny M. Cheung 2020-06-30 There is a growing knowledge base in understanding the differences and similarities between women and men, as well as the diversities among women and sexualities. Although genetic and biological characteristics define human beings conventionally as women and men, their experiences are contextualized in multiple dimensions in terms of gender, sexuality, class, age, ethnicity, and other social dimensions. Beyond the biological and genetic basis of gender differences, gender intersects with culture and other social locations which affect the socialization and development of women across their life span. This handbook provides a comprehensive and up-to-date resource to understand the intersectionality of gender differences, to dispel myths, and to examine gender-relevant as well as culturally relevant implications and appropriate interventions. Featuring a truly international mix of contributors, and incorporating cross-cultural research and comparative perspectives, this handbook will inform mainstream psychology of the international literature on the psychology of women and gender.

Things Fall Apart Chinua Achebe 2013-04-25 Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in Arrow of God and No Longer at Ease.
