Sexual Orientation and Transgender Issues in

Organizations Thomas Köllen 2016-04-25 Over the last decade workforce diversity has attracted much scientific attention. Given the shortage of literature on issues related to homosexual, bisexual and transgender employees, compared to other facets of workforce diversity, this book opens up new perspectives on this issue. Emphasis is placed on the equal consideration of gay, lesbian, bisexual, and transgender issues. Thus the predominance of lesbian and gay issues in LGBT research (and practice), will be contrasted by an explicit consideration of the unique experiences, stressors and related needs of bisexual and transgender employees. Contributions provide deeper insights into the differing experiences the whole spectrum of LGBT employees make in the workplace in different national and occupational contexts. Furthermore, the collection offers contextualized insights for evaluating and conceptualizing organizational initiatives aiming at a higher level of inclusion for LGBT

employees.

[Crowdfunding in Europe](#) Dennis Brüntje 2015-08-20

Crowdfunding is becoming an increasingly popular method to finance projects of every kind and scale. This contributed volume is one of the earliest books presenting scientific and research-based perspectives of crowdfunding, its development, and future. The European Crowdfunding Network (ECN) and its scientific work group, together with FGF e.V., invited both researchers and practitioners to contribute to this first state-of-the-art edited volume on crowdfunding in Europe. This book contributes to a better comprehension of crowdfunding, encourages further fundamental research and contributes to a systematization of this new field of research. The book also features expert contributions by practitioners to enhance and complement the scientific perspective. This book can be used as a guideline and shall advance classification in an emerging research field.

Citizenship Rights and Social Movements Joe Foweraker 1997 This is the first comparative study of the relationship between social movements and citizenship rights. It identifies the main connections made between collective action and individual rights, in theory and history, and tests them in the context of modern authoritarian regimes. It does so by measuring both social mobilization and the presence of rights over time, and by analysing their mutual impact statistically - both within and across national cases. The results create a new perspective on democratic struggles in authoritarian conditions, and on processes of democratic transitions. The selected cases of Brazil, Chile, Mexico and Spain are similar enough to make comparisons possible, and different enough to make them interesting. Measuring mobilization and rights provides a comparative description of their forms and fluctuations, just as the statistical results promote a comparative analysis of their influence and interactions. The study uses statistical techniques, but employs them to illuminate historical processes. In sum, its quantitative methods work to enhance the qualitative inquiry, and together they come to constitute a robust defense of democracy as the direct result of collective struggles for individual rights.

Slave Stealers Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She

published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Tom Kundig: Houses Dung Ngo 2006-11-09 The work of Seattle-based architect Tom Kundig has been called both raw and refined, as well as super-crafted and warm. Kundig's projects, especially his houses, uniquely combine these two seemingly disparate sets of characteristics to produce some of the most inventive structures found in the architecture world today. Kundig's internationally acclaimed work is inspired by both the industrial structures with which he grew up in the Pacific Northwest and the vibrant craft cultures that are fostered there. His buildings uniquely meld industrial sensibilities and materials such as Cor-ten steel and concrete with an intuitive understanding of scale. As Kundig states, "The idea is insaperable

from the fabrication, inseparable from the materials used." Tom Kundig: Houses presents five projects in depth, from their early conceptual sketches to their final lovingly wrought, intimate details. Kundig's houses reflect a sustained and active collaborative process between designer, craftsmen, and owners, resulting in houses that bring to life the architect's intentions, the materials used, and lines of unforgettable beauty.

Hav Jan Morris 2011-08-30 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Gun Culture or Gun Control? Peter Squires 2012-12-06 n 1996 the shooting and killing of 16 young children in a Dunblane primary school provoked wide reaching parliamentary reform to British gun laws. Within months virtually all privately owned handguns had been outlawed. *Gun Culture or Gun Control?* presents the first substantial analysis of the social and political

reactions to events in Dunblane and also examines many of the wider issues relating to gun control in the United Kingdom. Rigorously comparative throughout, Peter Squires provides a non-partisan exploration of the differences between attitudes to firearms and their control in Britain and in the United States. Amongst the topics the author considers are: * the social history of firearms on both sides of the atlantic * the differing policy directions adopted in Britain and the USA * media coverage of the gun question * firearms and policing * the future of the gun in society.

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular

regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
